

Application Modernization POV Overview

8-12 weeks / 50k USD

The application modernization (PoV) service is designed to help you envision the future state with Microsoft cloud platform.

CURRENT STATE

- ✓ Time and capital investment needed periodically for maintenance of current applications
- ✓ Day to day operations need temporary patches and workarounds, leading to downtime and lower confidence
- ✓ Outdated structures are inefficient, unproductive and at constant risk of breach

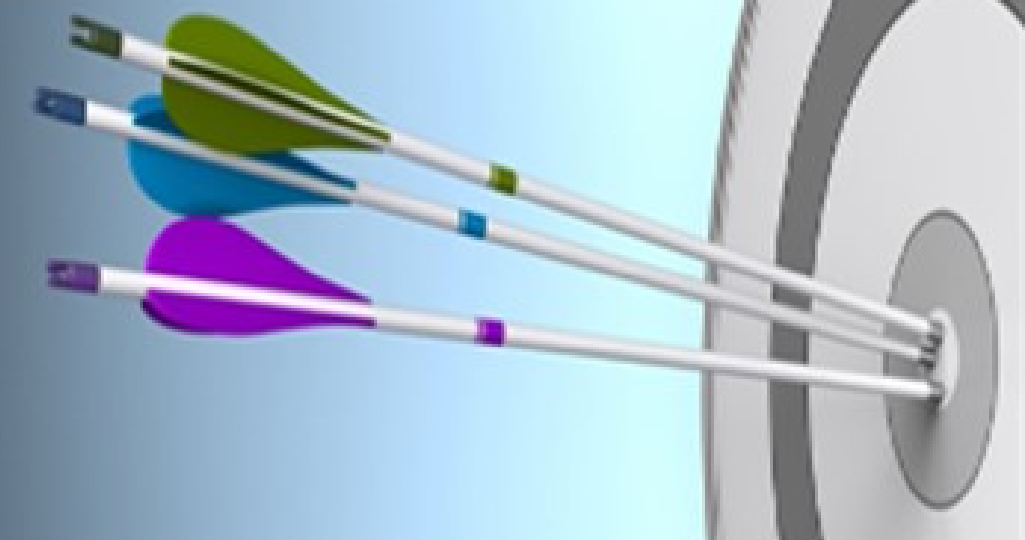

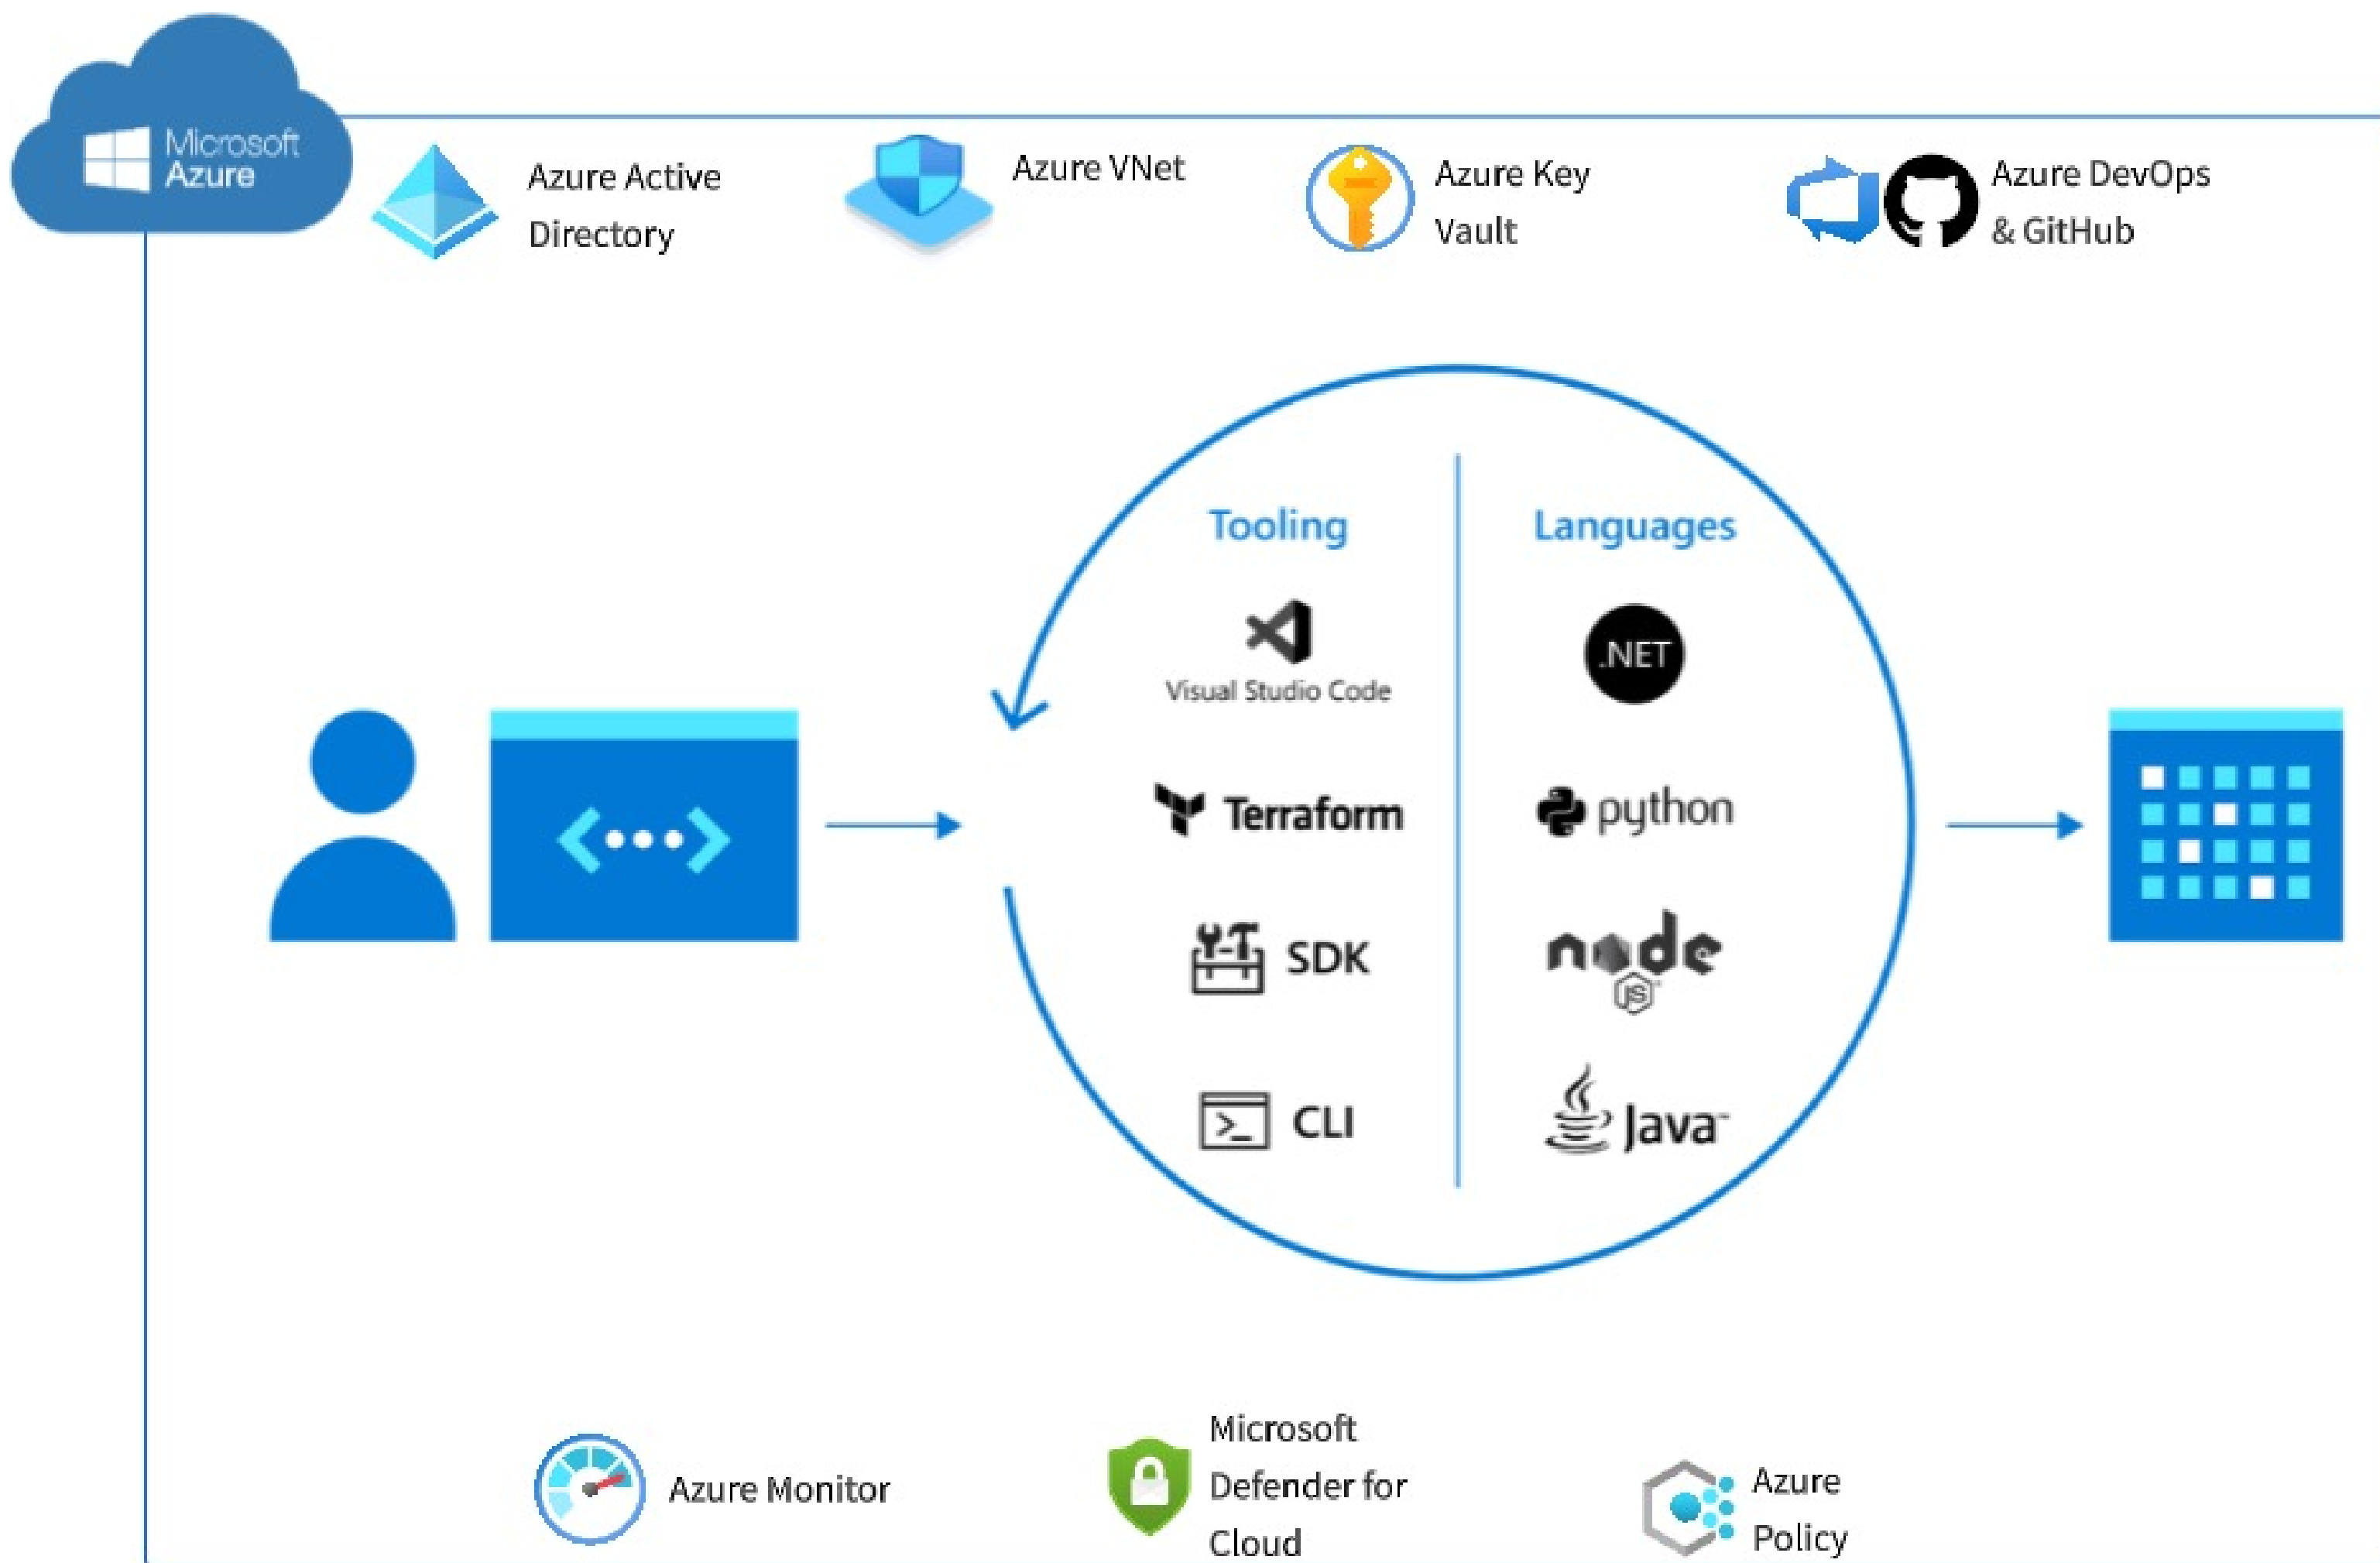

FUTURE STATE

- ✓ Reimagine legacy systems with industry leading platform and next gen use cases; security by design
- ✓ Lower operational costs
- ✓ Seamless user experience
- ✓ Differentiate from competition
- ✓ A modern application tailored to your unique business needs

WE HELP YOU RIDE THE WAVE OF DISRUPTION AND WIN WITH CONFIDENCE

1. REWRITE Develop modern applications from ground up
2. REPLACE Reengineer existing applications with modern add-ons
3. REUSE Migrate to the cloud

Application Modernization using Tools and Languages of your choice
