Analytics Modernization POV Overview

Our POV approach is underpinned by 2 key components – a. security & compliance, and b. cost optimization

Assessment & Strategy

✓ Collaborate with stakeholders to understand current landscape and pain points

✓ Obtain agreement on desired outcomes

✓ Tailored strategy to map Azure services to your unique needs

✓ Develop 2-week sprints for POV implementation

POV Implementation

✓ Data migration and transformation from selected data sources

✓ Data consolidation and scalable Data Warehouse using Azure Synapse Analytics

✓ Azure ML to build foundation models and underscore actionable insights

✓ Azure Power BI for interactive, visually engaging reports and dashboards

Knowledge Transfer

✓ Hands on training sessions for the team for smooth transition

✓ Enablement for scaling the solution and maintenance

$ **20k USD** 🕑 **6 Weeks**

Key Outcomes:

✓ Foundation for future state

✓ Controlled cost solution validation

✓ Security & Assurance

✓ Improved data accessibility

✓ Enhanced data processing & performance

Deliverables:

✓ Analytical workshops (high value use cases inventory, and pain points)

✓ Proposed Solution Architecture

✓ Competency & RACI matrix

✓ Process / Flow maps for modernization

✓ Value statistics

✓ Proposed implementation path

✓ Project documentation

Reference Architecture (Data Value Chain)
